# 100's Chart Worksheets

## 15 Ways to Use a Hundreds Chart

- Practice counting from 1 to 100.
- Identify even and odd numbers.
- Play BINGO by calling out a number and have your child cover it with a counter.
- Practice skip counting by 2's, 5's, and 10's.
- Use a 100's chart to find patterns in addition and subtraction problems.
- Practice money identification by counting by the monetary values of pennies, dimes, nickels, or quarters.
- Color in multiples of one number, looking for patterns.
- *I'm thinking of a number* – Tell your child that you are thinking of a number. Let them guess a number and you say higher or lower until they can guess the right number.
- Practice math problems by coloring multiples of certain numbers.
- Using a blank 100's chart, fill in some of the numbers but leave blank spaces. Have your child write in the appropriate numbers.
- Round to the nearest 10 – say a number and have your child put a marker on that number. Then let them decide which 10 that number is closer to.
- Cut up a hundreds chart into pieces and use it to make a puzzle for your child to put back together.
- Work on addition and subtraction strategies.
- Learn about prime and composite numbers by using 2 different colors to shade in each type of number. (Use the guide included with this list to help)
- Play a game of Plus Ten – start at any number and ask your child to add 10 using the hundreds chart as a guide.
